Overview

Choices' High Fidelity Wraparound connects youth and families with resources to help them thrive. Families are in the driver's seat and lead decision making. A team made up of friends, extended family, and community service providers help the family identify strengths, create a plan, and work toward achieving goals.

Who we serve

Choices serves families with complex needs who are usually involved with multiple systems, such as child welfare, juvenile justice, and mental health agencies.

Family needs

Our interventions address family needs such as:

- Risk of a youth's removal from the home
- Navigating multiple systems
- Substance use disorders
- Mental health
- Intimate partner violence
- Physical abuse
- Complex trauma
- Neglect

High Fidelity Wraparound

How it works

DCS refers the entire family to Choices Family Preservation Services.

Priority is placed on safety & crisis planning, in addition to weekly safety walkthroughs.

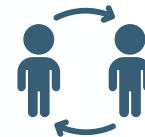

Planning concentrates on the entire family, with a focus on what is causing the highest risk of children potentially having to be separated from their parents.

Sustainable community supports & low/no cost resources are prioritized for long-term success and closure with DCS, including therapy, medication management and substance use disorder treatment.

Choices partners with the DCS Family Case Manager to facilitate a monthly Child & Family Team Meeting (CFTM).

Choices' peer support specialist acts as an extra support to the family, working with the care coordinator to meet the needs of the family.

About Choices

Choices is a national nonprofit committed to empowering individuals, engaging communities, and enhancing systems.

Our Indiana programs include:

- Children's Mental Health Initiative (CMHI)
- Children's Mental Health Wraparound (CMHW)
- Family Preservation Services
- School-Based Services
- Foster Care Solutions
- Behavioral Health Solutions, and
- The Choices Emergency Response Team (CERT)

Choices may access subcontracted providers for short-term support & services.
